

MyTutor Free Online School

Parents/Students,

Kings has been working with an online education program called MyTutor – and we are now able to offer a new Online School Service to all of our students.

The service covers GCSE: English/Maths/Science now and will extend to Geography/History/Languages

In the coming weeks it will also launch for Years 7-8.

This company provides live tutorials at specific times of the day which any student can access from a simple Zoom link- exactly the same way they have been accessing lessons from their own teachers.

When you sign up as a parent, MyTutor will email you the timetable for the week, and lessons for the day so you can be aware of what is on offer. Any missed lessons are posted afterwards on their Youtube channel. An example Timetable is below.

Wednesday 1st April	 GCSE Maths: Proportion & inequalities 12.15pm	Join the tutorial
	 GCSE Physics: Electrical Energy transfer 2.00pm	Join the tutorial
	 GCSE Biology: Animal organisation-gaseous exchange systems 3.15pm	Join the tutorial
Thursday 2nd April	 GCSE Maths: Simultaneous equations 12.15pm	Join the tutorial
	 GCSE Physics: Static electricity 2.00pm	Join the tutorial

This is a great, free resource to help keep students learning, busy, and active during their home schooling and we encourage you to take advantage.
